

Loving to Learn at Home-KS2

Mission Control – Read **(non-negotiable)**

Read for 20 minutes each day and talk to someone about it.
Recommend your book to someone else.

Mission 1 – Investigate

Visit the class page to look at the knowledge organisers and extend your learning on it. You could present this in a quiz, wordsearch, crossword, poster, booklet the options are endless!

Mission 2 – Real Life Maths

Find a maths problem in everyday life and work it out. Visit TTRS too to practise your times table and division recall. Practise telling the time and handling money.

Mission 3 – Think

Discuss this week's big question with someone at home.

Mission 4 – Create

Show something you have learned in a creative way. Build it, act it, sing /rap it, sew it, draw it, paint it. We'd love to see how you have been inspired.

Mission 5 – Challenge Yourself

Choose something you find difficult and practise it. Remember every time you challenge yourself, you grow your brain. You could login to Language Nut and challenge yourself to learn a new language.

Please choose 2 missions each week to complete at home. We would love you to share your learning missions with your teacher and class. We will display your learning in the hall for everyone to see. We have posted spelling lists and knowledge organisers for some subjects to support your learning.

Have fun!
